OBJECTIVE

Hi there, I'm Mohammed , I'm a React.js developer have 2 years of experience, I help people and brands reach their goals by building user interfaces and converting designs to interactive layouts,I can work from scratch and update existing systems.

EXPERIENCE

ICR

15/5/2022 -

Front-End developer (React js)

I'm still working at ICR until this time.

And during this period of work, i had worked on many projects of different sizes , which gained me a lot of diverse experience in front end development field.

EDUCATION

Damascus university

Third year

Information technology engineering
2024

PROJECTS

Myway educational platform

An electronic platform for remote learning that allows students to follow their curricula with ease and they can test their knowledge through thoughtful exams inside this platform and it has a lot of other features.

You can check the link down below to see it
<https://www.myway.edu.sy>

Covid-19 tracker

When the corona virus appeared in the 2020, I made an attempt to create a website to provide statistics about the extent of the virus around the world. You can check it out through the following link down below
<https://nosyrat-tracker-80a49.web.app/>

Website dashboard

This is a training project and you can take a look at it through the following link down below
<https://nosyrat-dashboard.web.app/>

MY ADVANTAGES

- Communication skills
- Problem solving
- Fast learning
