Most studies have highlighted the role of parents as active agents in the career development of their children. Parents want their children to opt for a career they know well about, but what their children want or aspire to become can be completely different. Many parents said they had misguided their children into choosing a career of their choice. It is very important not to burden our children with unreal expectations. There are a few factors that are of great importance in the career selection process. Psychologists said that it was very easy for a child to get swayed by peer pressure into choosing a career that the majority was opting rather than the one which was best for him/her. Although it should not be the most important, remuneration of a career holds value in one's life; nobody likes to earn little. A job's earnings should match the child's aspirations and provide a satisfying comfortable life. Modern societies need professionals in every field: utility workers, garbage collectors, farmers, nurses, doctors, engineers, teachers, professors and many others. Furthermore, demotivation might have a negative impact on the child's mental health when rejecting all of his/her ideas. Parents can work together to gather information about a career and then help the child in deciding whether it is suitable or not. Most people have dreams of future jobs and there's no limit to what this could be, but we can't be absolutely certain about our career choices. Researchers told us that through self-reflection and guided activities, we would find our core values and a clearer path towards the right career.

Poetry is an imaginative awareness of experience expressed through meaning, sound, and rhythmic language choices so as to evoke an emotional response. It has been known as music of ideas and employs metre and rhyme, but this is by no means necessary. In fact, poetry has been around for thousands of years. However, we might think of the epic poem as the first instance of poetry, appearing as early as the 20th century B.C. The Epic of Gilgamesh is often cited as one of the earliest works of epic poetry, dating back to the 18th century B.C. Consisting of Sumerian poems, it is a text that was discovered through many different Babylonian tablet versions during archaeological excavations. A list of the most notable works of epic poetry _ at least in the Western world _ would have to include the Iliad and the Odyssey, both works of Greek mythology that have been attributed to the poet Homer. Throughout history, poetry has appeared in different forms. The sonnet form became best known as an English poetic form through the work of William Shakespeare in the 16th century. Where did the poetic form lead after the sonnet? Elizabethan poetry of the 1500s soon shifted into Restoration Poetry and a marked turn away from the sonnet. Following the reign of Queen Elizabeth I, the English Restoration period, from 1660 to 1689, saw the rise of literary elites, such as John Dryden, perhaps one of the bestknown names of English literary criticism, translation, drama, and poetry. The form of the mock-heroic and the use of poetic form for satire did not end with Dryden. Alexander Pope, most famous for his work The Rape of the Lock (1712), carried on Dryden's tradition of using poetry for comedic ends.
