Famous British author Charles John Huffam Dickens was born on February 7, 1812, in Portsmouth, a port city in southern England. He was the second of eight siblings. His father, John Dickens, was a marine writer, and he dreamed that the profession would make him rich. His mother, Elizabeth Barrow, rose to become a teacher and then a school principal. Despite his parents' best efforts, the family remained poor. Nevertheless, the family was happy in its early days. In 1816 the family moved to Chatham, Kent, where Charles and his brothers were free to roam the countryside and explore Old Rochester Castle. In 1822, the family moved to Camden, a poor district of London. During this period, the family's economic conditions deteriorated, and his father was imprisoned in 1824, when Charles was only 12 years old. As a result of his father's imprisonment, Charles Dickens had to drop out of school and work in a boat-painting factory beside the Thames. This was the best he could do to help his family, bidding his childish innocence and this incident became a recurring theme in his writing. After a while he was allowed back to school after his father received a family inheritance which he used to pay off his debts. But when Dickens was fifteen, he was again denied an education, and in 1827 he had to drop out of school and work as a courier in an office to contribute to his family's income. As it turned out, this work became an early stepping stone towards his work as a writer. A year after starting his career in the office, Dickens began his work as a freelance report writer in the London law courts. Only a few years later, he became a reporter for two major newspapers in London. In 1833, he began presenting skits to various magazines and newspapers under the pseudonym (Boz). His first stories were published in his first book in 1836, Sketches by Boz. Dickens' writing became so popular with readers that he began publishing his first novel, Oliver Twist, as episodes in a newspaper, telling the tale of an orphan living on the streets.

Prose is a form of language that has no formal metrical structure. It applies a natural flow of speech, and ordinary grammatical structure, rather than rhythmic structure, such as in the case of traditional poetry. Normal everyday speech is spoken in prose, and most people think and write in prose form. Prose is composed of full grammatical sentences, which consist of paragraphs, and ignores aesthetic appeal in favor of clear, direct language. It can be said to be the mirror of informal speech. Some works of prose do have versification, and a mix of the two formats is called "prose poetry."

Nonfictional Prose: A literary work, that is mainly based on fact, may contain fictional elements in certain cases to express thoughts and ideas of the speaker. The form of writing is often hard and persuasive, and suits the occasion to convey a specific message. 2 Fictional Prose: A literary work that is wholly or partly imagined or theoretical. This is usually written in the form of a narrative, and may be entirely a fabrication of the author's imagination as in novels. The reason for prose acceptance can be attributed to its loosely-defined structure, which most writers feel comfortable using when expressing or conveying their ideas and thoughts. It is the standard style of writing used for most spoken dialogues, fictional as well as topical and factual writing, and discourses. It is also the common language used in newspapers, magazines, literature, encyclopedias, broadcasting, philosophy, law, history, the sciences, and many other forms of communication.
