

A- Read the following test then do the tasks below:

The first paper was made from cloth nearly two thousand years ago in China. Although paper can be made from all kinds of materials, such as cotton fibers, grass or sugar cane, these days wood pulp is the material most commonly used to make "new paper" that is, paper which contains no old or recycled paper. The modern world uses so much paper that environmentalists have persuaded us that we should recycle old paper. There is an increasing awareness in Syria of the need to recycle both paper and other materials. Paper-recycling containers can now be found in some parts of the country and some government agencies have begun paper recycling programs. Also, there is greater education in schools about the need to take care of our environment. Although we use wood pulp from trees to make new paper, it is not true that recycling paper saves trees. Trees are a commercially grown long-term crop, so that when they are cut down, new ones are planted. Also, papermakers use the parts of trees that cannot be used in other industries such as building and furniture making.

Answer the following questions: (18 marks)**1- When was paper first made?**

.....

2- What materials are used to make paper?

.....

3- Why do environmentalists want to recycle old paper?

.....

Find words in the text which mean the following :(10 marks)**4- Material or fabric used to make clothes.****5- Very small pieces of paper, wood, cloth, etc.****Rewrite these sentences about the text to correct the sentences: (12 marks)****6- There is a lack of awareness in Syria of the need to recycle both paper and other materials.**
