

I- Read the text and answer the questions below:

Not all people have the ability to explore their future and build it with more confidence and clarity. Most studies have highlighted the role of parents as active agents in the career development of their children. Parents want their children to opt for a career they know well about, but what their children want or aspire to become can be completely different. Many parents said they had misguided their children into choosing a career of their choice. It is very important not to burden our children with unreal expectations. There are a few factors that are of great importance in the career selection process. The child's aptitude is a mirror of his/her personality, strengths, and weaknesses. Hence, a designed aptitude test can reveal a lot of information regarding the child that can help in taking a well-informed career selection. It is very difficult to spend your life working in a field that you are not interested in. Courses leading towards a desired career should be found easily for the young to enable them to make right decisions about their future. Psychologists said that it was very easy for a child to get swayed by peer pressure into choosing a career that the majority was opting rather than the one which was best for him/her. Although it should not be the most important, remuneration of a career holds value in one's life; nobody likes to earn little. A job's earnings should match the child's aspirations and provide a satisfying comfortable life. Modern societies need professionals in every field: utility workers, garbage collectors, farmers, nurses, doctors, engineers, teachers, professors and many others.

II- Read the text and answer the questions below:

Our life is a short journey, and every day we learn many important lessons that we must benefit from in order to be able to achieve more successes, and to make life beautiful and prosperous. Most people think that education is limited to schools only, but the truth is that there are lessons that we can only learn from life, and they may be more important than those learnt at schools. Life lessons are sometimes painful before they are acquired, and in order to avoid this, we must benefit from the experiences of others. We shouldn't pay too much attention to the trivial things that are not important and waste our time and effort. Since life is so unpredictable, we must not live on expectations only and meet everything new in life with optimism and positive thinking. There is no word more boring and monotonous than the word "I". We must be confident of ourselves, but that does not mean we talk about ourselves and our accomplishments all the time, as this leads to vanity. Human relationships are also important because without love and support from family and friends, you would not feel happy and would not achieve success in life. Man by nature makes mistakes, so be tolerant and seek excuses for those around you, and if someone comes to you with an apology, do not stop him, and do not carry in your heart any envy of anyone. Take care of your health and make it a priority for your entire life. There are no alternatives to exercising, eating well, fresh air and sunshine. The golden rule for everybody is to be honest, trustful, useful and generous so that they leave life with a trace that those around them will not forget about.
